Profiles [in](#) [Sri Bharath](#)

---

**Summary** 5th Semester Computer Science Engineering student proficient in programming, and full-stack development. Strong project management skills and a passion for continuous learning. Dedicated to problem-solving and integrating innovative technologies to deliver impactful solutions.

---

<b>Education</b>	<b>Cambridge Institute Of Technology</b>	<b>2022-2026</b>
	5th sem	Information Science And Engineering
	CGPA-8.62	

---

**Projects**

**IoT-Based Soil Moisture Monitoring System**  
A small project was developed for soil moisture level monitoring using sensors and IoT technology. It had real-time data collection integrated with cloud platforms for further analysis and automation of irrigation systems for effective use of water.

**Quiz Game in C Programming**  
A console-based quiz game is developed to pose interactive multiple-choice questions and ensure real-time tallying of scores. Loops, conditionals, and arrays design the game to handle dynamic questions and seamless gameplay.

**Student Management System**  
Designed a Student Management System to handle student records, grades, and course information. Functionality includes basic CRUD for adding a student record, updating a student record, deleting a student record, and report generation for performance tracking and pass/fail reports. Built along with a database holding information about students, courses, grades, and attendance, as well as optimized SQL queries allowing efficient data retrieval and management.
